

Akron, Canton & Youngstown

50' PS-1

CARS 1700 & 1767
SPECIAL RUN 2-Pack

Division 1 of the Mid-Central Region of the National Model Railroad Association supports both N-TRAK and HO modular layouts. To celebrate the Division 1 Module Group's fifth anniversary it has issued these previously unavailable Akron, Canton & Youngstown boxcars for N-Scale modelers and collectors. The ACY had 165 route miles of track running east-west across northern Ohio between Akron and Delphos.

Cars #1700/1767 were part of a 150 car series built in 11/1964. These 50'6" Pullman Standard boxcars with yellow sides, black ends, roof and roofwalk came with 15' PS-1 combo doors. These N-scale cars are Micro-Trains Line body style 33000, 50' boxcar with steel plug and sliding door. They are proudly produced by Micro-Trains in Talent, Oregon, USA.
