

The 4th Division of the Pacific Northwest Region of the
National Model Railroad Association Presents

April 2020 Newsletter

Our seventh clinic of the season is **CANCELLED**. Even our pre clinic dinner would be inappropriate at this time.

Since the venue for the clinic is likely to stay closed longer than many other locations due to the Coronavirus Outbreak (COVID-19) the fate of the April clinic is also in question.

Mt Vernon Clinic
Mt Vernon April clinic is also canceled.

Down the line:

Don't hold your breath for this one.....

May show and tell and achievement evaluating.

Layout Progress:

Clinic chairman Rich Blake got bored and had some extra wood laying around so he made himself an isolation circle for the modules. This way he can socially distance himself while watching trains go around in circles.

Will also work for various switching problems and rolling stock/loco testing, win win.

Before Alan asks – 22" radius.
